EDUCATION

University of British Columbia

Sept 2023 – Present

B.Sc. Statistics

Dean's List (2023W, 2024W) • Indonesia Maju Full Scholarship • Outstanding International Student Award

State Islamic Senior High School 1 Ciamis

Jul 2020 – May 2023

Mathematics and Science Intensive Program

Ranked 1st of 290+ students • Full Academic Scholarship

SKILLS

Languages Python, R, SQL

Libraries pandas, NumPy, SciPy, scikit-learn, matplotlib, seaborn, plotly, NLTK, spaCy

Tools Git, GitHub, Jupyter Notebook, Tableau, MySQL, Oracle, Excel

EXPERIENCE

Web and Technical Support Coordinator

Mar 2026 – Present

Association for Women in Mathematics at UBC

- Maintain the organization's website, online forms, and mailing lists to support digital communication and operations.
- Provide technical support for events and manage digital infrastructure for community initiatives.
- Collaborate with the organizing team to streamline online platforms and communication workflows.

PROJECTS

Credit Card Fraud Detection

Nov 2025 – Dec 2025

- Built ensemble models (Random Forest, XGBoost, LightGBM, CatBoost) for fraud detection in a highly imbalanced dataset.
- Applied class imbalance techniques and achieved test ROC-AUC of 0.980 with LightGBM.
- Evaluated performance using ROC curves, confusion matrices, and feature importance analysis.

E-Commerce Data Analytics

Dec 2025 – Jan 2026

- Analyzed ~250K UK e-commerce transactions using Python, SQL, and Tableau.
- Built SQL queries to identify top products, revenue trends, and customer spending patterns.
- Developed Tableau dashboards to communicate insights for business decision-making.

Twitter Sentiment Analysis (NLP)

Feb 2026 – Mar 2026

- Performed sentiment classification on Twitter data using TF-IDF vectorization and machine learning models.
- Visualized sentiment distributions and key terms using matplotlib and WordCloud.
- Explored text patterns to understand public sentiment across trending topics.

ACHIEVEMENTS

1st Place – DataQuest Competition

Dec 2025

UBC Data Science Club

- Analyzed Vancouver business trends using time-series and machine learning models.
- Presented data-driven recommendations on emerging economic sectors.
